Electric Vehicle Charging Stations

Electric Vehicle Charging Stations 2020

Eversource and the Town of Agawam recently completed the installation of seven dual-port electric vehicle (EV) charging station sites at municipally-owned properties:

Agawam High School

Agawam Public Library

Borgatti Park

Corey Street Bandstand

School Street Park

Shea Field

Agawam Senior Center

Agawam Public Library Charging Station

Agawam’s Electric Vehicle Charging Stations

Agawam High School Charging Station

Town officials received support from Eversource to install the infrastructure that provides power to the EV ports. The program covers all costs for electrical infrastructure needed for the stations and manages the process. The town only had to purchase and install the charging equipment.

This collaboration supports the town and energy company's commitment to reduce greenhouse gas emissions in the commonwealth, 40% of which come from the transportation sector.

Resolution on Charging Fee April 2021

April, 2021 - The Agawam City Council approved a resolution that would charge electric vehicle owners 60 cents per kilowatt-hour to use the city's charging stations. Owners will be charged for the electricity only, not network or administration fees.

Agawam has a total of seven such stations that were free to use, and officials had previously discussed a fee of $1 per kilowatt-hour in order to offset the city's subscription and upkeep costs. Councilor Dino Mercadante said the reduction in the proposed rate was an attempt to encourage use of the stations without requiring taxpayers to subsidize their costs.
